SALES WERE HEAVY.

Nearly Twenty-Five Thousand Shares Change Hands at Good Figures.

MERCUR TAKES A JUMP.

Arrangements to Entertain the Eestern Newspaper Men.

Excitement at Mercur Over the Discovery of Arsenical Ore-Operations at Bingham-The Macabee Incorporated-To Develop Claims in Hardscrabble-Sediment Trap Company-Business Briefs-Yesterday's Quointions-The Clearings-Ore and Bullion Receipts-Mining Notes and Personals.

Yesterday was a "hot number" on the floor of the stock exchange, and for awhile excitement ran higher than was ever before witnessed in the pit since the opening of the exchange.

Most of the listed stocks held their own in good shape, but the unlisted stocks suffered a ferocious attack from the bears, and when the call ended a goodly score proved that the sales made were greater than on any preceding day.

Daly was a prime favorite, and the stock gained several points in the bidding, but holders of Daly shares, thinking that "discretion was the better part of valor," kept a safe distance from the charging bovines.

Daly West was unusually strong, owing probably to the announcement of a rich strike having been made in this property, mention of which was given exclusively in these columns, and be-fore the close it was in great demand

East Golden Gate showed an upward tendency, and a bid of 60 cents for 10,-000 shares of this stock met with no re-

sponse. Horn Silver also came to the front in good shape, and scored a few points above previous quotations. cur started out at a good figure chronicled a sale of fifty shares

Mammoth was stationary, and no

Mammoth was stationary, and no sales were recorded.

Ontario, however, went skyward, but the buyers could not fill at the figures named, which were the highest yet made for this stock since the opening of the board.

When Sunshine was called the brokers seemed to be on the alert in a sold.

When Sunshine was called the brokers seemed to be on the alert in a minute, and an air of expectancy was observable on the faces of all. The first sale was made at \$3.56, Harkness to Donnellan. This was the signal for a regular hurrah, and the brokers got down to work in earnest, and 600 shares changed hands at varying figures. Sheets buying 500 out of the 600 sold, while Colborn, Hill and Hudson were the sellers.

The Macabee Gold Mining company.

When Little Pittsburg was called, Broker Airis decided to have a little fun at his own expense, and after 7,000 shares had been sold at from 2% to 2% cents, he threw himself wide open and disposed of 10,000 shares at figures ranging from 2% to 1% cents. To say that the brokers were wild is putting it mild, and the speciators had more fun than a little.

The excitement continued unabated when Dalton was called, for a hear movement was noticeable at once, and this bruin was impersonated by Broker Woolley, who offered Dalton in blocks of 10,000 at 4½ cents a share. A few shares changed hands at this figure, even if an assessment was to be levied upon the stock, which is not as leveled upon the stock, which is not as leveled upon the stock, which is not as leveled upon the stock, which is not as figure, even if an assessment was to be levied upon the stock, which is not as yet an assured fact, by any means; and even then, the stock should not decline more than a cent, the probable company incorporated to Develop

eline more than a cent, the probable amount of the assessment.

Morgan of Hardscrabble made a sale

After the call President J. W. Don-ellan stated that the governing board Chatter Box, Lucky Star, Double-After the call President J. W. Donnellan stated that the governing board
had decided to send Judge E. F. Colborn to the opening of the New York
exchange. He believed that the judge
was just the man for such an errand,
and predicted that as a result of his
extendance there, his speeches, his
newspaper interviews and the information he would give relative to the vartion he capital dard. Craw Lacky Star, Double Standard. Craw Lacky Star, Double Star, Dard. THE PRESS EXCURSION.

Arrangements Being Made to Entertain Eastern Newspaper Men. The joint committee, comprising

members of the stock exchange, chamber of commerce, Salt Lake Press club

600 and the Utah Press association, which
was recently appointed for the purpose

650 of making arrangements for an excursion of eastern newspaper men to
Utah, the Intention being to show
them the wonders of the mining camps
of this state met at the stock exthis state, met at the stock ex-

them the wonders of the mining camps of this state, met at the stock exchange last night.

John J. Daly was appointed chairman and George E. Blair secretary. After some discussion a committee was appointed consisting of Messrs. F. J. Leonard, G. E. Blair and R. W. Sloan, who were instructed to walt upon the newspapers of the city and secure their co-operation in the project, when the meeting adjourned to meet Friday at 7:30 p. m. Every member of the committee is requested to be present, accompanied by as many of his friends as he can bring with him.

The importance of this enterprise cannot be over-estimated, for the results of such an excursion cannot but prove to be beneficial to every mining camp in the state, and it is believed that everyone interested in the welfare and growth of Utah will contribute liberally toward defraying the expenses contingent thereto.

FOUND ARSENICAL ORE.

After call Secretary Frank L. Hill Great Excitement in Mercur Over a submitted the following letter from W. F. McMillan, agent for the B. & M. (Special to The Herald) (Special to The Herald.)

ment prevails in Mercur today over the discovery of arsenical ore in the Eagle mine, as it proves the continuity of the zone of rich ore from the mines of Mercur to this property.

The Eagle shaft is now down 270 feet, and for some time the men employed in the mine have been sinking in oxidized ore that gave good promise for the future of this property; but yesterday this grade of rock gave way to

a body of arsenical ore, which, from all appearances, is identical to that found in the Golden Gate mine. This is one of the most important discoveries made in the camp of late.

discoveries made in the camp of late, as it demonstrates the fact that all of the intervening ground between Mercur and the Eagle mine is on the same belt, and that all that is needed to transform the different claims within the charmed circle into producing mines is work, and plenty of it.

George L. Korner, one of the Eagle company, was on the ground when the discovery was made, and to say that he is greatly elated is putting it mild. Work is being pushed on the property and already the new ore body has been sunk upon for some distance.

Manager P. J. Quealey of the Old Grover group, recently a portion of the

the group. Mr. Quealey, who recently explored the underground workings of the Golden Gate is free to say that it is the greatest mine in the United States, and as the Old Grover group addons this research. adjoins this property, he is sanguine that success will crown his efforts and

that success will crown his efforts and that of his associates.

Work is being pushed on the East Golden Gate, and from all appearances the company means business, for preparations are being made for the erection of a substantial holst, and the engine and boilers will be the best yet brought into this camp. The double compartment shaft on this property is even now in good ground, and under the direction of two such mining men as G. H. Robinson and George Kislingsbury it is but a question of time before the apparents will be trans-

men as G. H. Robinson and George
Kislingsbury it is but a question of
time before the property will be transformed into a producing mine.

The Gold Dust is also showing up well,
and already good values have been
obtained. It is the intention, however,
to sink until the main ore body is
reached, and while not much is being
said regarding this property, the company is "sawing wood" and attending
strictly to business.

Mercur and the whole district is
boomling and our streets are filled with

booming and our streets are filled with strangers

who is in the city on business, says sold last week under an attachment, that in his opinion Bingham is one of The mine was formerly owned by Park the greatest mining camps in the C'ty men west; and to prove his assertion he states that he can count one hundred mines in that camp that are now producing or are on the list as producing of the district and is in raptures over the outlook for the Ajax mine, which, in mines in that camp that are now pro-ducing or are on the list as producing mines, and he wants to know "what camp can beat this."

At the present time Bingham is fur-nishing three-fourths of the lead pro-duced in the west, and her great mines seem inexhaustible, while her leading mines, such as the Old Jordan and South Galena, the Daldon and Lark, the Lead mine, the Phoenix, the Yo-semits No. I and a dozen other producers are daily sending out a stream

of wealth.

In the Phoenix mine, with which the Coromandel was recently consolidated, a body of high grade ore has recently been uncovered, which Judge Quilm says is the largest body of ore ever exhibited in West Mountain mining district, and that "there are millions in sight in this mine."

sight in this mine."

In Markham gulch a fine body of high grade ore has been opened up in the Brie mine, in which Messrs, Groesbeck and Raybould are interested, and in the same locality a number of fine discoveries have been made of late, White mining has been carried on in Bincham for many years but ittel while initially has been carried on in what is a superstant of the comparatively. The superstant of an over surplus of water; but this water problem is now being solved by running long tunnels, which drain the mines at great depth. One tunnel (the Butterfield) is that that dep.h. One tunnel (the Butterfield) is already in a distance of \$2.00 feet, the face being at a vertical depth of 2.200 feet, and in its construction fine ore thooles have been cut, which proves without a question of doubt the permanence and continuity of the ore-bearing zone of the district. Two other long tunnels are in contempte-

ling, Daniel M. Murchle, John W. Burton, James H. Moyle, Ann aurchie and George E. Hill.

The most important transaction of James H. Moyle has been elected as president, Dan M. Murchle, vice president, John B. Cummock, treasurer; A. S. Fowler, secretary, and these, together with John W. Burton, Thomas S. Fowler, John Sterling and John M. Fowler, and with the exception of A. S. Fowler, and with the exception of A. S. Fowler, and with the exception of A. S. Fowler, make up the board of directors.

F. L. Dec, agent for the Sullivan F. L. Dee, agent for the Suillivan Machinery company of Chicago, contractors for prospecting mineral lands, is in the city. His firm has done a large business with diamond drills in the Johannesburg country, but the recent troubles in that vicinity have stopped operations in this line and Mr. Dee is now here to ascertain what can be s now here to ascertain what can be done in the Mercur district with dismond drills

camp yesterday, and the smiles that embellished his classical countenance can be accounted for by reason of the excellent showing made in this benanexcellent showing made in this bonan-za mine.

When seen by a Herald representa-tive yesterday, Mr. Beck said that a short time ago a three-foot body of ore had been uncovered in new ground on the eighty-foot level 500 feet south of the main shaft, that mills 200 ounces in silver to the ton. This new dis-covery seems to be a fissure vein and has been drifted upon for fifty feet without showing any change in size. This ore is being taken out and mixed with ore of a lesser grade for shipment. E. E. Croaks, owing to a press of business, has moved his office to rooms 231 and 232 Atlas block. Mr. Croaks while in Mercur last week purchased a lot on which he is now erecting a two-story store and office building, 24 x80 feet. Mr. Croaks is a new comer in Utah, but he is giving evidences of his good husiness sagacity by getting in on almost every good thing that comes along.

M. H. Ryan and G. H. Robinson re-turned last night from their Mammoth trip, and they report that the Ajax mine is tooking out of sight. Mr. Ryan took in the Utah mine during his stay Another important discovery was also made in the Bullion-Beek a few days ago, when a chimney of ore, varying from six to eight feet in width, was uncovered on the 600 level 400 feet south of the main shaft, that assays so ounces in silver and 12 per cent lead in Tinite, and he says that he went through 4,000 feet of ore in the drifts and tunnels in this splendid property. Mr. Ryan started on his trip apparelled in a brand new suit of corduroys, but as they were splashed with candle grease upon his return, he can now go and come without fear of being called a "dressed-up tenderfoot." to the ton.

In the other portions of this great mine the various ore hodies are showing up well, and it is safe to say that it is good for dividends for many

A model of Don C. Robbins' sand and A model of Don C. Robbins sand and sediment trap is now on exhibition in Rognon & Scott's office in the Atlas block. This is a unique and ingenius device for cleaning irrigation ditches, etc., from sand and sediment, and canyears to come.

The Bullion-Beck is now shipping 100 The Bullion-Beck is now shipping 100 tons of first-class ore daily, besides which it is milling about seventy-five tons of second-class.

This is a magnificent property and its stockholders are getting ready to gather in the \$25,000 dividend plum, which will probably be ripe and ready for picking about the 15th inst. etc., from sand and sediment, and cannot but commend itself to all who see it. A number of California gentiemen are now negotiating for the state right of California for the Invention. They propose to use it largely where water is obtained from flowing wells, as the water is so full of sand that a closedown is necessitated frequently to clean out flumes and ditches. Parties from Oregon and Colorado are also after state rights, and if Utonians do not look out some outsider will secure the right for this state.

Mr. R. Busenbark, vice-president of A. D. Hudnall Becomes a Local Representative of a Big Company. An important change was inaugurated yesterday whereby Mr. A. D.

milites on elections, moving the adoption of the East Golden Gate Mining company, left last night for New York. As soon as he can wind up his business affairs in the cast, Mr. Busenbark will return to Salt Lake with the intention of making this city his permanent home. Since coming to Salt Lake Mr. Busenbark has made many warm friends among our people. He is a modest, unassuming gentleman, but acquaintance with him proves his substantiability and worth, his enterprise and sterling business ability, and if is to be hoped that upon his return which will be within thirty days, he will bring a hundred men with him for the same make-up as himself. Mr. B. will be present at the opening of the New York mining exchange and intends to impress upon his eastern friends the great mineral wealth of Utah.

THE ELECTION CONTEST.

At this point Mr. Lewis moved the adoption of the majority report of the committee on elections, recommending that the contests for the seats of Mr. Smoot and Mr. Larsen be dismissed and those gentlemen be permitted to retain their seats. The motion carried, and then Mr. Lewis asked that the continuation of the consideration of the reports of the elections committee with reference to the contest for Mr. Lemmon's seat be taken up and to bring the matter before the house, moved the adoption of the majority report. Mr. Mansfield moved as a substitute

Mr. Mansfield moved as a substitute that the minority report be adopted. He then stated that he thought the proper course would be to continue in committee of the whole, the committee having arisen and asked leave to sit again. Mr. Smoot also thought this was the proper course, but the speaker held that there was no record to that effect, and the matter therefore came before the house instead of the committee of the whole, where it was intended it would be settled.

Mr. Smoot arose to address the house

exposition of the great public wrong that would have been perpetrated had the majority decided to unscal Mr. Lemmon, simply because it had the power, and without sufficient evidence to justify the action, for, he held, it would become a precedent to guide and justify majorities in the legislature.

TH REPORTS REJECTED

We smoot was followed by Mr. Critchlow, who took the floor to briefly state his position in the matter. He could not support the minority findings in their entirety, neither could he agree with the majority of the committee. He had carefully weighed the evidence in the case, and it was his indigment that it proved beyond room for doubt that two votes should be deducted from the vote of the contested as having been illegal, and two should be added to the vote for the contestant which were not counted by the Judges of election. This, he been level, should have been the finding of the circulous committee from the evidence, and as such as conclusion left the contestae with a majority of one School Bill-State Board of Horticulture.

Heved, should have been the inding of
the elections committee from the evidence, and as such a conclusion left
the contestee with a majority of one
still in his favor, he could not support
the recommendation to unseat Mr.

Provo sought to squure the seat of file Representative Hyrum Lemmon, came up in the house yesterday aftermoon and was settled for good and all by the house voting unanimously to dismiss the contest and permit Mr. Lemmon to retain his seat.

The action was unexpected. In that most of the members supposed the most of the members supposed the matter would be deferred until evening and that a night session would be held for its especial consideration. The result, however, was not unexpected after Mr. Mansfield had on Friday evening delivered his able argument expusing the great wrong that would be done by adopting the majority report held twelve to have been illegally cast. He took the same expusing the great wrong that would be done by adopting the majority report held twelve to have been illegally cast. He took the same continued unseating Mr. Lemmon. The Republican house, in its action, not only vindicated Mr. Lemmon in his ciaim to sit, but humiliated its own committee beyond all precedent by everwhelmingly rejecting the report of one of its own committees on a purely party question.

It showed, however, that men can at times rise above party fealty when a question of right and wrong is in the balance.

The matter came up as soon as the opening preliminaries had been observed, by Chalerman Lewis of the committee on elections, moving the adoption of the committee's report, recommending that the contests against Representatives Smoot and Larsen he dismissed and they be permitted to

LEMMON WINS.

Mr. Critchlow moved after the result of the vote was amounted that the contest of Bringhurt against Lemmon be dismissed, and the notion carried unanimously. On first reading of bills the following were introduced:

SCHOOL BILL.

H. B. No. 163, by Stevens—Providing for a uniform system of free schools. The bill re-enacts the present school law to make it conform to the changed conditions from territorial to state-hood conditions. The various sections cover the subjects: "Composition of the board of education, power to grant teachers' dislorant provided in the control of the sections." teachers' diplomas, qualifications for such diplomas, validity of such diplomas, subjects for examination for such diplomas, authority to appoint assist-ants, revocation of diplomas, defrayal of traveling expenses, chairman and secretary of the board, validity of acts of the board, times of meetings of the

mission business at Kansas City.

This means that Mr. Hudnall will be the manager for the Salt Lake branch for that firm, and will have sole charge of such business for all this western territory, and will be empowered to contract for and advance money on stock deals to the numerous dealers. contract for and advance money on stock deals to the numerous dealers throughout the west. Mr. Hudnall has had twenty years experience in the business, and will command a wide-spread field that will net good results spread field that will net good results to this inter-mountain country. Up to date the Denver & Rio Grande has made no announcement of who will fill the position made vacant by the retirement of Mr. Hudnall. It can safely be said that Salt Lake will profit by the Siegel-Saunders company establishing a branch house here, and they have made no mistake in the selection of a man so well and favorably known as is Mr. Hudnall.

his opinion, will make its stockholders

The ledge assays \$1.50 at the surface and can be traced for four miles, and along its entire length the values do not vary more than a few dollars. The Rio Grande Western has just completed a new siding at the T. & B. sampler extending the entire length of the yard, an improvement that will be highly appreciated by the managera of the sampler as well as the yard men. —Murray American.

Murray American.

J. H. Holmes of Ogden, who has always been associated with full grown enterprises, has taken a shine to Mercur of late, and now proposes to show what he can do towards the unbuilding of that camp. Mr. Holmes will open an office in Mercur, and also in this city. The Gold Dust mine, at Mercur, is showing up well. At fifty feet the shaft cut through seventeen feet of ore that carried values of from 60 cents to \$2.80 in gold. The shaft is below the 100 foot level, and it is expected that
